SP 303

Spray degreaser for mechanical components

DESCRIPTION

SP303 is a spray detergent designed to clean and degrease mechanical components properly.

The product has been developed to perform an effective cleaning action without releasing the typical strong smell due to volatile solvents, a significantly felt problem by the operators when they're required to work in reduced spaces such as the driver's cab.

SP303 does not contain components harmful to health and it's specifically formulated including no-flame propellants.

Test the compatibility of **SP303** before using on rubbers, plastics and painted surfaces.

APPLICATIONS

SP303 has been formulated under specification of SPII-Schaltbau to clean and degrease the mechanical components inside the driver's desks.

DIRECTION OF USE

- ✓ Shake the can before use
- ✓ Spray evenly keeping the can at about 25 cm (10 in) from the surface
- ✓ Let the product act and then clean the treated surface

STORAGE

Store the product in a cool, well-aired area, keeping it away from heat, flames, sparks and other potential ignition sources. Do not spray on naked flames or any other incandescent or heated material. Do not spray on live electric and electronic devices including contacts and batteries. For further information, please refer to the safety data sheet.

TYPICAL DATA

Appearance	Aerosol
Colour	Colourless
Vapour pressure	5250 hPa
Relative density	0,80
Solubility	Soluble in organic solvent
Flash point	Not flammable

PACKAGING

SP303 is supplied in 400 ml spray cans packaged in 12 pcs carton.
